PROFILE

Specialized engineer with 6 years of experience in software engineering, including more than 4 years dedicated exclusively to test automation and technical documentation. My work is built on precision, analysis and reliability: designing test suites, hardening CI/CD pipelines and ensuring deliverable compliance. I'm looking for a QA Automation Engineer / SDET position, permanent or fixed-term (CDI/CDD), fully remote or hybrid.

PROFESSIONAL EXPERIENCE

Agent Engineer — Freelance

October 2025 – June 2026 · Full remote

- Design and deployment of custom conversational agents: RAG architectures connected to internal knowledge bases, multilingual platforms and multi-agent systems
- Response quality validation and regression testing

Technical Writer — Freelance

August 2025 – October 2025 · Full remote

- Built API and product documentation projects independently: developer guides, OpenAPI specifications
- Docs-as-Code approach integrated into CI/CD, endpoint verification (Postman) to ensure documentation accuracy

QA Automation Engineer — AssessFirst

April 2022 – July 2025 · Full remote

- E2E test automation (Cypress-Cucumber-Gherkin) and API testing (Postman)
- Built the XRay-Cypress pipeline for quality tracking in Jira
- Performance testing (k6) and API technical documentation

Full-stack Developer → QA Automation Tester — ApsideTOP

October 2019 – April 2022 · Le Mans, then full remote

- Design and development of web applications (Java, Angular) in the insurance/health insurance sector
- Transitioned into test automation: execution, creation and maintenance of test suites, reporting and issue tracking

E-learning Instructor — LinkedIn Learning

July 2021

- Designed and recorded the course "Entity Framework Core 5 Essential Training"

SKILLS

QA Automation / SDET: Cypress (Cucumber/Gherkin), Playwright, Selenium, Appium, Postman, k6, security testing, XRay-Cypress pipeline

Development: Java, Angular, Python, JavaScript/TypeScript, REST APIs, FastAPI, Git, CI/CD (GitHub Actions, GitLab), code reading in C#, PHP, Go, Ruby

AI Agents: LangGraph (Supervisor pattern), Claude API (Structured Outputs), RAG (FAISS), Pydantic

Documentation: Docs-as-Code, OpenAPI/Swagger, Confluence, Notion, technical reports and non-technical summaries

PORTFOLIO

QA Agent Supervisor — Multi-agent system (LangGraph + Claude API) that orchestrates a real Playwright/pytest test suite: failure triage, reliable flaky test detection (via re-run, not estimation), reports for technical and non-technical audiences.

Neolens RAG Agent — RAG agent specialized in medical image analysis, documentation search, source citations.

Neolens – API Documentation (Docusaurus, fictional project) · **Cognitia API – API Documentation** (GitBook, fictional project) · **Chatbot API – API Documentation** (MkDocs, fictional project)

EDUCATION

POEC Java JEE Developer — M2i Formation, Le Mans

March – June 2019

Java, JavaEE, SQL, Git, HTML5, CSS3, JavaScript, Spring Boot, Angular, agile methodologies

OpenClassrooms — short training modules

2017 – 2019 · non-certifying

Web development (HTML, CSS, JavaScript, UX), marketing / SEO

Proofreading training — Centre d'Écriture et de Communication, Paris

2008 – 2009

Master's 1 in Modern Literature — Université du Mans

2007 – 2008 · Specialization in children's literature

CERTIFICATIONS

- Introduction to LangGraph — LangChain Academy
- Agent Observability & Evaluations — LangChain Academy
- Ambient Agents with LangGraph — LangChain Academy
