

Bérangère Gallais

QA Automation Engineer / SDET / AI Agent Engineer

Le Mans, France +33 6 77 58 80 91 contact@berangeregallais.com
linkedin.com/in/berangeregallais berangeregallais.com

PROFILE

QA Automation Engineer with more than four years of experience in test automation, after starting my career as a Java/Angular developer. At AssessFirst, as the sole automation engineer in the QA team, I defined the test strategy and automated E2E and API tests. I also build AI agents in Python (LangGraph, Claude API) and test them the way a QA engineer would: test sets, regression testing, response evaluation. Based in Le Mans, France, I'm looking for a permanent position in Le Mans or fully remote. Available immediately.

PROFESSIONAL EXPERIENCE

Freelance
Oct. 2025 – June 2026 · **9 months**

Agent Engineer

Full remote

- Independently designed and built AI agents in Python: multi-agent orchestration with LangGraph (Supervisor pattern), Claude API with structured outputs, RAG (FAISS), data validation with Pydantic
- **QA Agent Supervisor**: multi-agent system that drives a real Playwright/pytest test suite, triages failures and detects flaky tests by re-running them
- **Neolens Support Agent**: technical support agent for a fictional API, sourced answers, out-of-scope questions rejected, covered by 137 automated tests
- AI-assisted development with coding agents (Claude Code, Cursor)

Freelance
Aug. 2025 – Oct. 2025 · **3 months**

Technical Writer

Full remote

- Independently wrote REST API documentation (developer guides, OpenAPI specifications), with endpoint verification in Postman

AssessFirst
Apr. 2022 – July 2025 · **3 yrs 4 mos**

QA Automation Engineer

Full remote

- Sole automation engineer in a 3-person QA team: defined the test strategy, reviewed user stories and wrote BDD scenarios (Gherkin)
- Automated functional and E2E tests (Cypress-Cucumber) and REST API tests (Postman)
- Built the XRay-Cypress pipeline for quality tracking in Jira
- Performance testing (k6) and API technical documentation

ApsideTOP
Oct. 2019 – Apr. 2022 · **2 yrs 7 mos**

Full-stack Developer → Test Automation Engineer

Le Mans, then full remote

- Automated functional, E2E, regression and API tests (Selenium-Ruby, SoapUI) in a cross-functional automation team: creation, execution and maintenance of test suites, issue tracking in Jira
- Trained 2 colleagues, technical and non-technical, in test automation
- Previously, developed business web applications in Java and Angular for the insurance/health insurance sector, using TDD, in a 6-person Scrum team

LinkedIn Learning

July 2021 one-off assignment

E-learning Instructor

- Designed and recorded the course "Entity Framework Core 5 Essential Training"

SKILLS

Testing & quality: test strategy, TDD, BDD (Gherkin), functional, E2E, API and regression testing, performance testing, issue tracking

Automation: Cypress (Cucumber), Playwright, Selenium (Ruby), pytest, Postman, SoapUI, k6

AI agents & LLMs: LangGraph (multi-agent), Claude API, structured outputs (Pydantic), RAG (FAISS), agent evaluation and observability

AI-assisted development: Claude Code, Cursor, GitHub Copilot

Languages: JavaScript/TypeScript, Python, Java, Ruby, SQL, Angular

CI/CD & tools: Git, GitLab, GitHub Actions, Docker, Jira, XRay

Spoken languages: French (native), English (B1+/B2, professional conversation)

CERTIFICATIONS

- Introduction to LangGraph — LangChain Academy
- Agent Observability & Evaluations — LangChain Academy
- Ambient Agents with LangGraph — LangChain Academy
